Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/519,759

Applicant(s)

HOFFMAN, KENNETH S.

Examiner

CHRISTOPHER J. DARNER

Art Unit

3633

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,5-9 and 12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,5-9 and 12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-8508)
- 4) ☐ Interview Summary (PTO-413)
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____
- Paper No(s)/Mail Date _____

DETAILED ACTION

Response to Amendment

Specification

1. The amendment filed October 15, 2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Paragraph [0027], it is preferred that the legs overlap such that each leg has three distinct portions: ...and a third middle portion both overlies an adjacent leg and underlies an adjacent leg. The medial portion has not been defined on the leg and was not in the original disclosure. Therefore, since the reference drawings are not to scale, the subject matter is not believed to be shown and the drawings cannot be relied upon for providing support for the added subject matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Zdeb et al. (US. PGPUB 2003/0046878).

With respect to claim 1, Zdeb discloses a roof flashing strip comprising an elongated member (32) having a backing plate (34) and succession of substantially parallel legs (36) projecting laterally outwardly therefrom and substantially normal thereto in Figure 1b, 2a, and 2b. Zdeb discloses the legs being inclined with respect to a horizontal plane at an angle of at least one degree and each leg having opposed first and second edge portions and a medial portion extending between the edge portions wherein at least some of the succession of legs have the first edge portion thereof overlying the medial portion of the next adjacent preceding leg and the opposite second edge portion underlying the medial portion of the next adjacent succeeding leg at page 2, [0035], line 5-11.

With respect to claim 2, Zdeb discloses the roof flashing strip wherein the angle ranges from about one degree to about five degrees at page 5, [0035], line 9-11.

With respect to claim 3, Zdeb discloses the roof flashing strip wherein at least some of the seccession of legs form a set of five succeeding legs with the third leg of said set being separated from the first and fifth legs of the set by said next adjacent preceding leg and said next adjacent succeeding leg, and further wherein the first and

Art Unit: 3633

second edge portions of said third leg, respectively , overlie the second edge portion of the first leg and underlie the first edge portion of the last leg in Figure 1b, 2a, and 2b.

With respect to claim 5, Zdeb discloses the roof flashing strip wherein a gap is defined between the overlying portion of the legs in Figure 1b, 2a, and 2b.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zdeb et al. (US. PGPUB 2003/0046878) in view of Bodycomb (U.S. Patent # 5,414,964).

With respect to claim 6, Zdeb does not teach a method of manufacturing a roof flashing strip which comprises extruding the roof flashing strip. Bodycomb teaches a method of manufacturing a roof flashing strip which comprises extruding the roof flashing strip at column 4, lines 33-36. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a method of manufacturing a roof flashing strip which comprises extruding the roof flashing strip

Art Unit: 3633

taught by Bodycomb in order to allow for easy manufacturing of various shapes and dimensions.

With respect to claim 7, Zdeb teaches the method wherein the roof flashing strip is formed from a plastic material or a metal material at page 3, [0046], lines 1-4.

With respect to claim 8, Zdeb teaches the claimed invention except for wherein the roof flashing strip is formed from a plastic material selected from a group consisting of polyvinylchloride, high density polyethylene, polyurethane, and polyvinylacetate. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to roof flashing strip from a group consisting of polyvinylchloride, high density polyethylene, polyurethane, and polyvinylacetate, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. It is also common knowledge to choose a material that has sufficient strength, durability, flexibility, hardness, etc. for the application and intended use of that material. It would have been obvious to use plastic for the device, because plastic will not rust and deteriorate when exposed to the weather.

With respect to claim 9, Zdeb teaches the method wherein the roof flashing strip is formed from aluminum at page 1, [0003], lines 1-3.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zdeb et al. (WO/2002/063113) as applied to claim 1 above, and further in view of Lewellin (U.S. Patent # 4,941,304).

Zdeb teaches a roof slashing system comprising a roof flashing strip in Figure 1b, 2a, and 2b.

Zdeb does not teach a base strip, the base strip comprising an elongated member having a backing plate, the backing plate having a top strip and a bottom strip which project outwardly therefrom and extend laterally along the backing plate, and the top strip and bottom strip being inclined with respect to a vertical plane at an angle of at least one degree. Lewellin teaches a base strip, the base strip comprising an elongated member having a backing plate (22), the backing plate having a top strip (20) and a bottom strip (21) which project outwardly therefrom and extend laterally along the backing plate, and the top strip and bottom strip being inclined with respect to a vertical plane at an angle of at least one degree at column 2, lines 52-55. It would have been obvious to one having ordinary skill in the art at the time the invention was made to include a base strip, the base strip comprising an elongated member having a backing plate, the backing plate having a top strip and a bottom strip which project outwardly therefrom and extend laterally along the backing plate, and the top strip and bottom strip being inclined with respect to a vertical plane at an angle of at least one degree as taught by Lewellin in order to an opening in which to fit a shingle.

Response to Arguments

6. Applicant's arguments filed October 15, 2007, have been fully considered but they are not persuasive.

In response to applicant's argument that Zdeb does not show wherein at least some of the succession of legs have a first portion overlying the medial portion of the next adjacent preceding leg and the opposite second edge portion underlying the medial portion of the next adjacent succeeding leg as per Figure 1b, 2a, and 2b, the examiner respectfully disagrees. Figure 2a clearly illustrates a first portion overlying the medial portion of the next adjacent preceding leg and the opposite second edge portion underlying the medial portion of the next adjacent succeeding leg as describe in claim 1. There is no functional language in the claim limitation that describes the same medial portion of a leg which both overlies an adjacent leg and underlies an adjacent leg. Therefore, the applicant is arguing limitations that are not claimed.

7. Applicant's arguments, see Remarks, filed October 15, 2007, with respect to the rejection(s) of claim(s) 6-9 under Hickner have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Bodycomb.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER J. DARNER whose telephone number is (571)270-3658. The examiner can normally be reached on Monday thru Friday 7:30AM to 4:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian V. Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
